

Our more than 67,000 employees, physicians and caregivers across North America are connected through one unifying purpose: the patients who entrust us with their care. Whether leading the evolution of home dialysis or value based care, we are driven by our shared commitment to improve the lives of people living with kidney disease by creating the next generation of renal care for tomorrow and beyond.

We embrace innovation across our network of dialysis centers, outpatient cardiac and vascular labs, and specialty pharmacy and laboratory services. We manufacture and distribute a comprehensive line of dialysis equipment, disposable products and renal pharmaceuticals. The scope and sophistication of our vertically integrated network provide us with seamless oversight of our patients' needs.

We have an unmatched capacity to analyze immense amounts of clinical data from within our own care ecosystem, maintaining a world-class research network. The ability to champion data-driven care innovations remains one of the company's key competitive advantages, informing every aspect of patient care and experience, quality improvement programs, coordinated care delivery and care integration.

MISSION

To deliver superior care that improves the quality of life of every patient, every day, setting the standard by which others in the healthcare industry are judged.

VISION

To be the leader and partner of choice in managing care in a value based system, we must continuously create clinical value for our patients and payors that translates to economic value for all of us.

VALUES

Collaboration

We team up.

We work together to accomplish more than what is possible individually.

Proactive

We get things done.

We see opportunities where others don't and challenge the status quo with a **no-limits mindset**.

Reliable

We do what we say.

We put **patients and partners first** and consistently deliver exceptional service. We act with **honesty and integrity** and never compromise safety, **quality** and the health of our patients.

Excellent

We exceed expectations.

We are **results oriented** and use best practices. We suggest ideas on how to improve and **innovate**.

PATIENT EXPERIENCE PROMISE

We promise to deliver safe, high-quality, reliable, personalized care with empathy, compassion and respect.
